All major functions of the D-BOX show up in the highly intuitive and rock solid program, providing limitless new solutions to age-old studio problems. Want to listen to an artist s instrument in the live room while switching monitoring sources in their headphones No problem. Want to give a couch-bound producer control over the talkback mic through their phone Simple. Want to listen to your mixes from the hallway while still swapping monitors or switching a sub in and out You got it. If you can dream it up, the D-BOX app will deliver. THREE MASTERING GRADE DIGITAL-TO-ANALOG STEREO CONVERTERS Our D-A converters have been at the heart of award winning tracking, mixing, and mastering studios for decades. Advanced clock stabilization, top-of-class chip sets, and our uncompromising analog signal path add up to a D-A that s as powerful as it is nuanced. Clarity and musicality of your digital sources are no longer trade-offs, but will come together for the best possible monitoring available in any price category and the D-BOX is loaded with three: USB, AES/SPDIF and Bluetooth. TWO POTENT HEADPHONE AMPS A great session requires a great headphone mix, and a great headphone mix requires a great headphone amp. With the D-BOX you get two of them. These potent amps are so clean, powerful, and accurate that many engineers use them exclusively for fine-grained quality control listening right before delivering a record to market. With the easy yet elaborate routing capabilities of the D-BOX , you ll be able to send any source to either headphone amp from either the front panel or remotely from within the D-BOX app. TALKBACK FROM ANYWHERE DAWs are incredible tools, but they don t offer all the tools you need to make your studio sessions run like clockwork. The onboard talkback mic The D-Box offers a simple and full-time solution to one of the most fundamental needs of a studio. Now that you can check that talkback microphone anywhere through the D-Box app, you will find yourself shaking your arms much less and communicating more effectively with your collaborators. Rock Solid USB Connectivity for Windows and Mac USB Audio connectivity has come ahead in the last ten years, and Dangerous has been at the forefront of its development all the time. With the D-Box you do not only get an ultra-Welce and low latency USB port, the latest connectivity without drivers on macOS and the impeccable driver support on current Windows computers is also obtained. You say goodbye to merge with the software just to get up and run, and say goodbye to the plug-and-play connectivity. A mixer Summing Eight-channel anyone who has heard what a dangerous summer of Somma can do to improve the sound impact, the panning, the depths and the width of a mix knows that there is no substitute for the analog sum when its fact to the right. We have heard stellar results from the traditional routing of subgroups to separate analog channels up to routing more effects returns to its analog paths for a dimension without rivals. Mixing is an art form, and our analogical fill mixer help you create masterpieces. Features The 6 -channel analog mixer, recently updated, offers a huge sound stage and a higher sound impact five analog and digital inputs at hand (analog stereo, analog sum, USB, AES/SPDIF, Bluetooth) The free App D -BOX offers remote control of all the main functions (volume, dim, talkback, i/o select, and more) the dedicated app is performed on macOS, Windows, iOS and Android devices and USB connectivity computers without driver for macOS : Simple installation of the USB driver for Windows Talkback Mic with Push-Button activation (on the front panel or remote apps) double-class caps with independent independent headphones selection and level control (front panel or app) Three independent speaker outputs (selected from front panel or from app) Programmable speaker selector allows for dedicated mono and/or sub inclusion on all outputs When you are recording employeescAAA hours for payroll, youcAAAAll want to keep good records of hours worked so that they receive the proper pay. Your company should have specific protocols for filling out time sheets, so read on to learn more about how to account for your employeescAAA hours properly.Track Hours DailyThe best way to keep track of hours worked is to implement some type of system for tracking hours daily. You can have employees fill out physical time sheets and compile them once a week or at the end of the pay period. You can also have employees punch a clock that calculates hours worked for each employee automatically.If your employees report their own hours, consult their time sheets and see how they compare with your records. While your employees should report things honestly, itcAAAAs important to keep things aboveboard by verifying their reports against the records that you have kept manually or via time clock.If you notice any discrepancies, discuss them with the employee in question. Perhaps a simple oversight its to blame. If there are any further issues, raise the question with human resources or the appropriate reporting manager.Account for Vacations and BreaksIn addition to reporting hours worked, youcAAAAll also need to account for vacations and breaks. If your employees have a standard company-wide break schedule, you can apply the deductions across the board. If employees have varying break schedules, ensure that they keep accurate reporting of these hours.YoucAAAAll also want to account for employee vacations since the employees away will not be submitting their own daily reports. Make note of vacation days on a separate, central calendar so that you can add the information when you Your payroll time sheets. USA APP OR ONLY OF REGISTRATION ON A TIME, Manual registration of the sheet was the standard for time reports. However, these days, there are a variety of online options and apps for electronic time reporting. Your payroll or HR department may have a recommendation for keeping time logs online, or you may be able to do your research and submit a request for this addition to software training. Vietize every time you have updated your time Sheets for each employee, sign them before sending them to the payroll. Many employers also require employee signatures for timesheet presentations, so take time to collect signatures. If you are sending your time sheets electronically, follow the sending protocol automatically to send the reports to your pay envelope department. More information from Questionnwered.
